

1. (a) Color tabs to include 4 more colors:

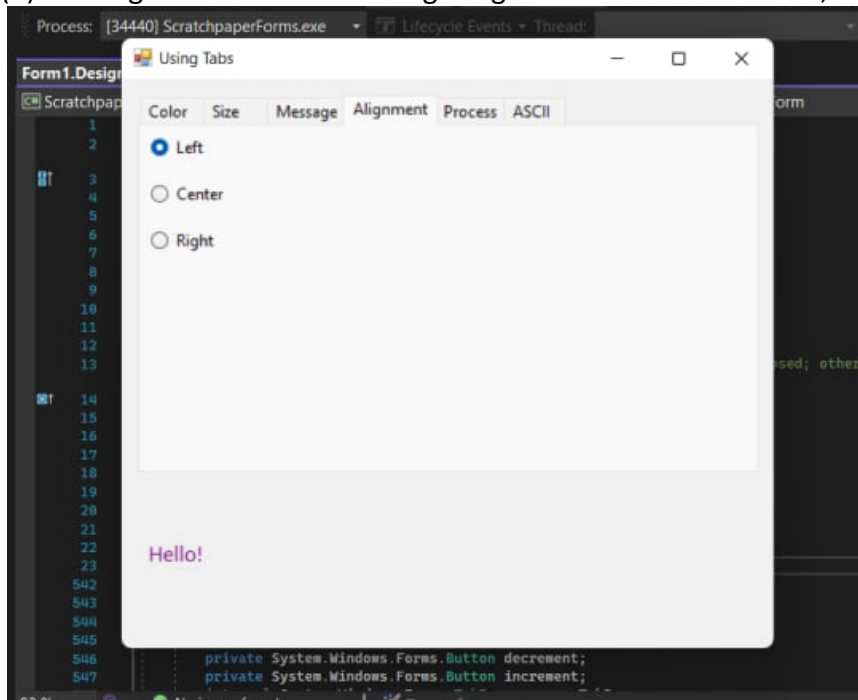

Size Tab enhanced to display the text in more font sizes:

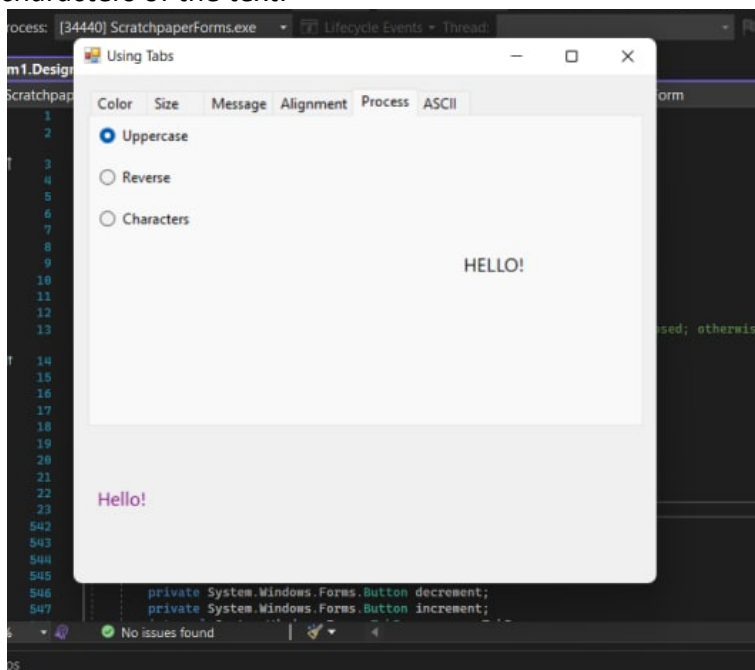

Message Tab enhanced to display different texts:

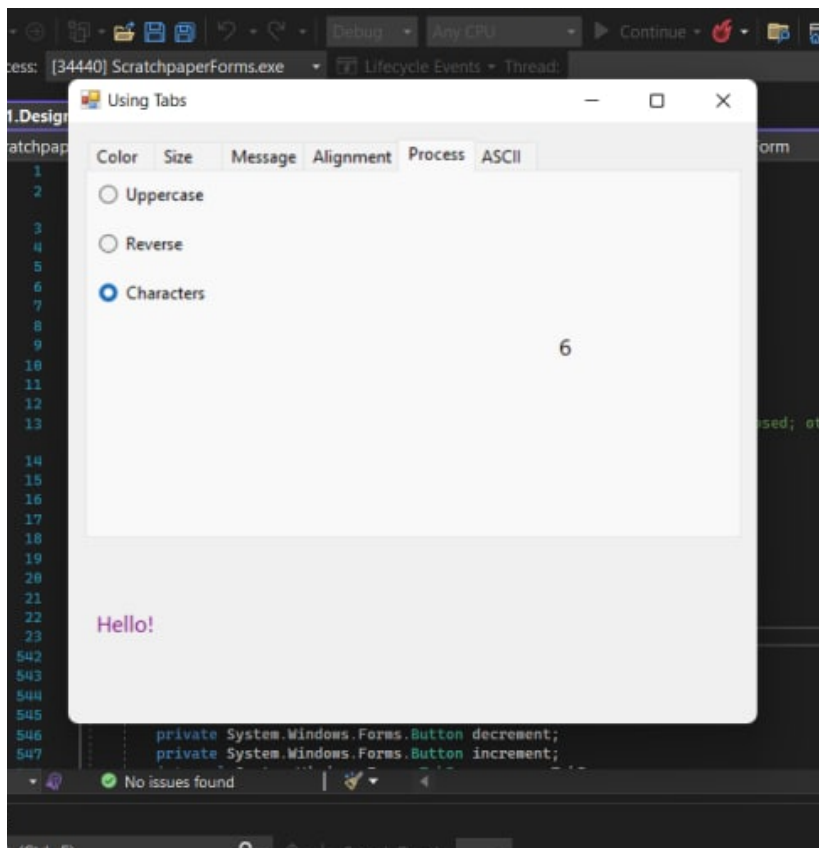

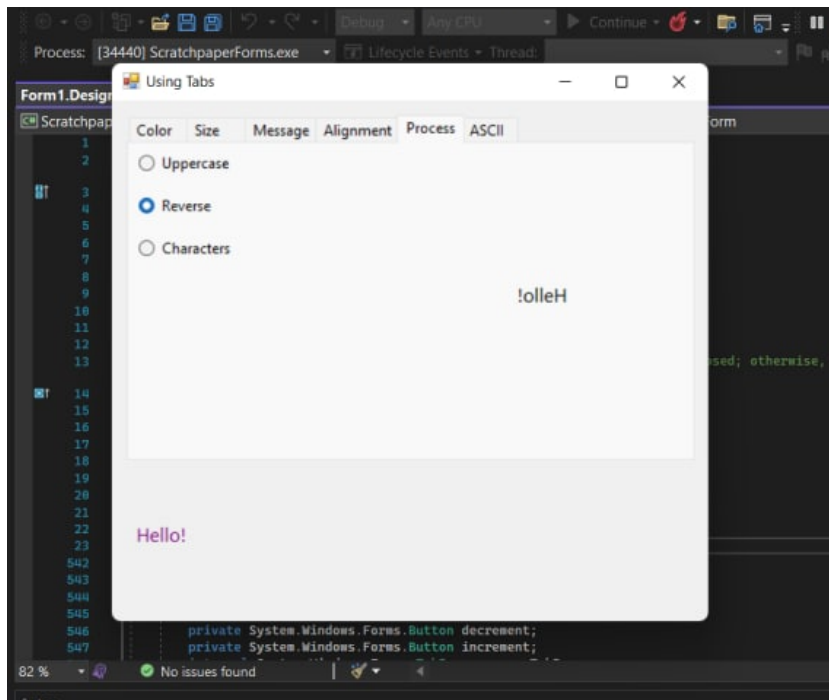

(b) Tab alignment added to change alignment of the text to left, center or right

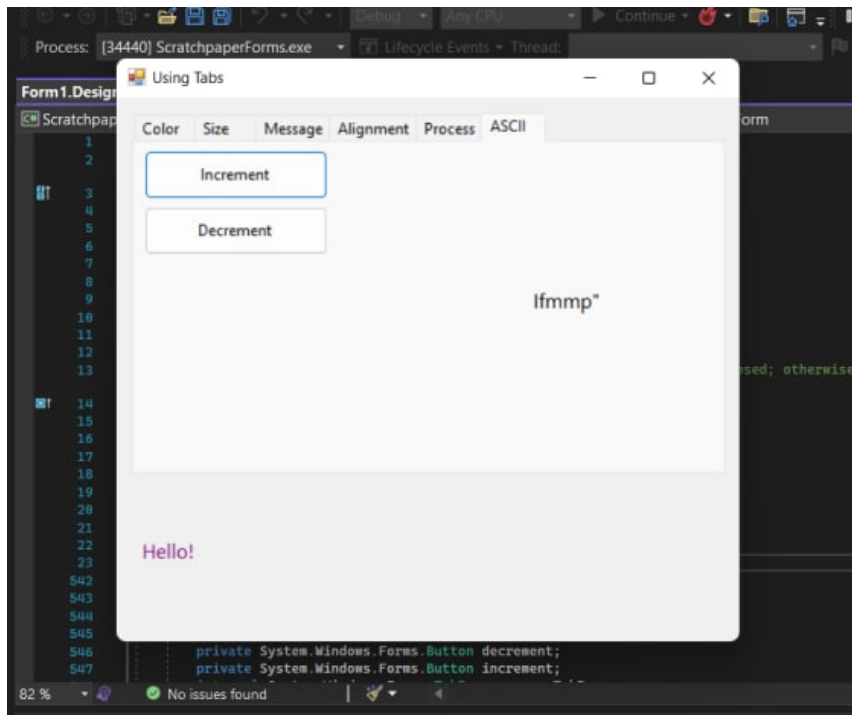

(c) Process Tab added to display the text uppercase, reverse or display the number of characters of the text.

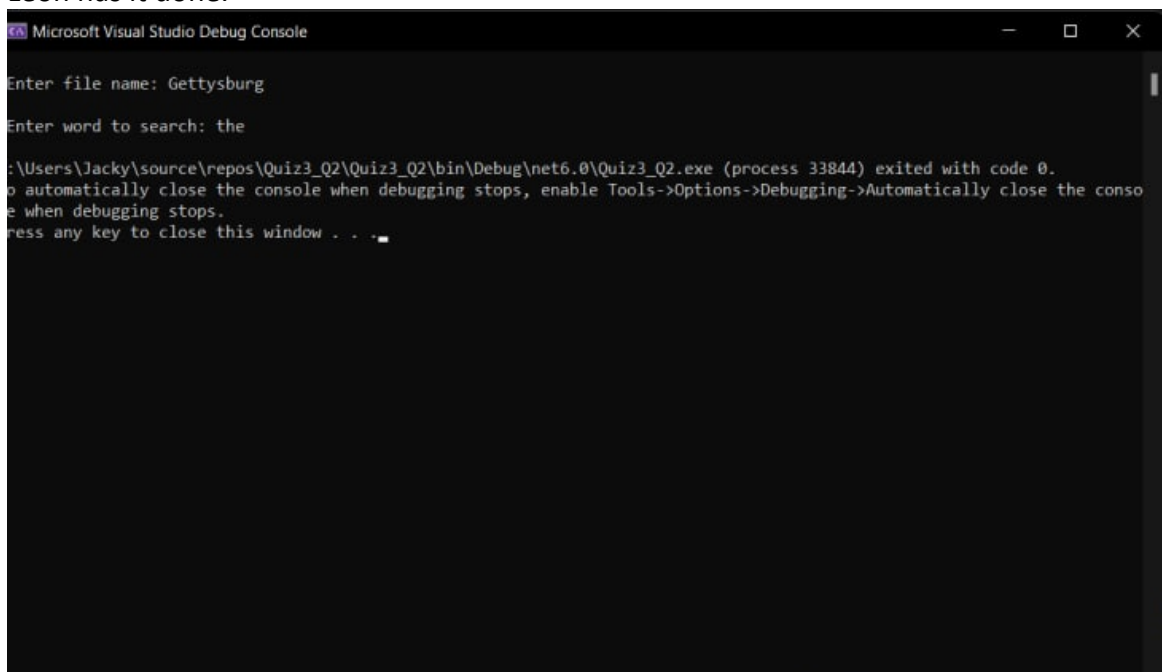

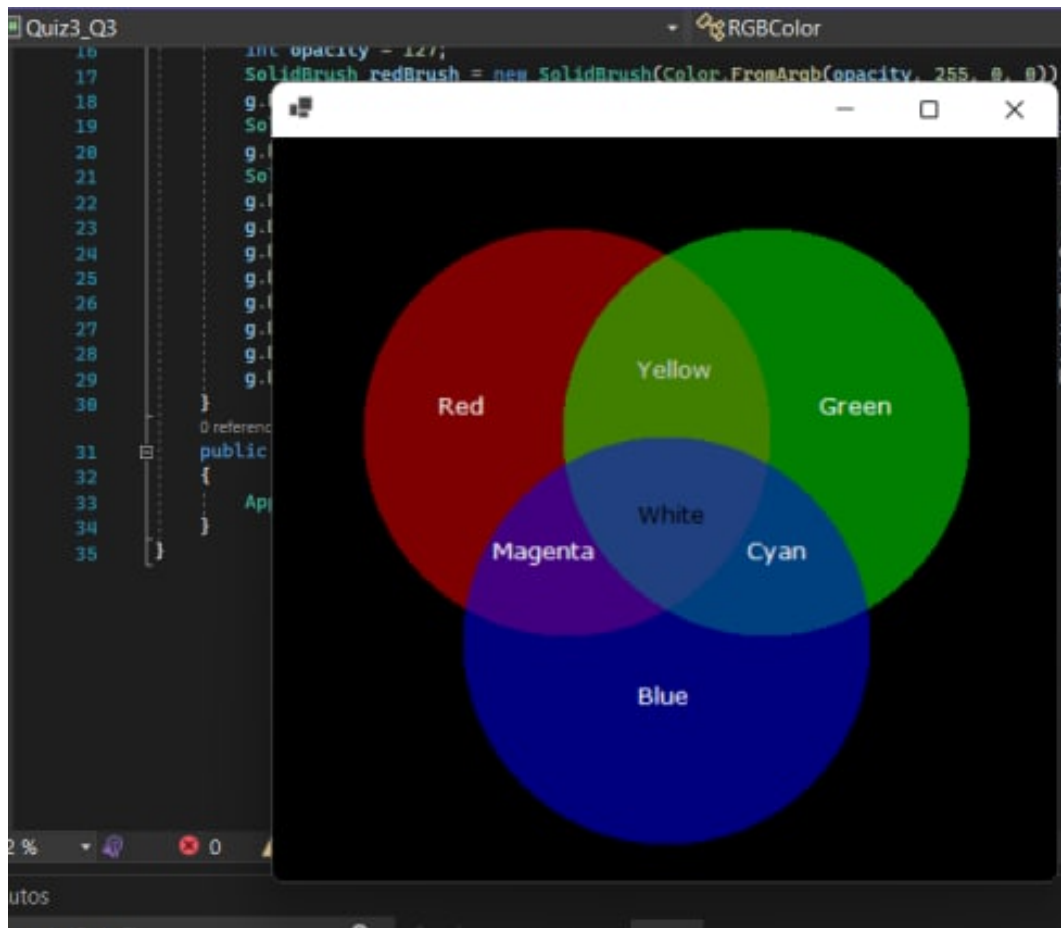

(d) ASCII tab added to display the ASCII increment/decrement of the text

2. Only source code is finished. No output. Likely getting runtime error. Leon has it done.

- 3.

Obtained by filling the ellipse with additive colors (red, green and blue first) then filling the overlapping areas with the respective colors and the text with the corresponding colors.
